Also, your insurance company can provide helpful information on home cleanup after a flood and can also provide information on how to document damage, hire cleanup contractors, etc.

Tips for Identifying, Storing and Transporting a Hazardous Waste

Identifying Hazardous Waste (and remember, electronics are considered hazardous too!)

The following warning words on a container can alert you to the hazardous nature of its contents:

Danger, Poison, Toxic, Corrosive, Volatile, Flammable, Inflammable, Combustible, Explosive, Caution, Warning, Harmful, Oxidizer, Irritant, Environmental Hazard

Proper Use & Storage of Hazardous Materials

MOST IMPORTANT: Follow the directions on the label.

Ask the dealer or manufacturer to provide more explanation if needed.

Don't use more of the product than is recommended.

Never mix products; this can lead to explosions or poisonous gas being released.

Use hazardous products in well-ventilated areas and always use gloves, eye protection and air purifying respirators whenever warranted.

Never eat, drink or smoke where hazardous products are being used.

Keep products in their original containers.

If you do have to use a different container be sure to label adequately to prevent poisoning and for safe use and disposal.

Store all hazardous products upright, tightly sealed, and away from pets, children and food.

Transporting Household Hazardous Waste to a Hazardous Waste Collection

Never mix different chemicals! Toxic fumes or an explosion can result and it prevents recycling of the materials.

Leave waste products in their original containers, and make sure caps and/or lids are securely closed. Gasoline is highly flammable and should only be transported in purpose-designed gasoline cans or containers. Do not transport hazardous wastes in the same portion of your vehicle as humans or pets.

If the original container is leaking or damaged, place the entire container in a larger container such as a clean paint can, plastic bucket, or wrap securely with plastic. If you wrap up a container so that the original label cannot be seen, mark the contents to the best of your ability, and be sure to tell the collection staff what the contents are.

Separate different types of waste, such as paints, motor oil, batteries, pesticides, acids, etc. Place containers upright in sturdy cardboard boxes or plastic trays, and pad with newspaper. You may also want to line your car with plastic before you pack the car.

Put containers in trunk or rear of your car, not on passenger seats. Come straight to the Hazardous Waste Collection to avoid any problems with the waste.

Don't eat, drink or smoke while handling household hazardous wastes. Wash your hands after handling
